Health check-ups for people who train

A proposal for gyms, coaches and fitness communities in Nagpur

NABL accredited since 2011 | Laxmi Nagar and Ramdaspeth

Questions your members already ask

“Is my heart ready for high-intensity training?”

Treadmill stress test, ECG and NT-proBNP

“My creatinine came back high. Is it my kidneys or my protein and creatine?”

Kidney function by cystatin C, which muscle mass does not distort

“My shoulder hurts on bench press. Is it a tear?”

Ultrasound by a musculoskeletal (MSK) radiologist

“I am cutting hard. Are my hormones and iron holding up?”

Hormone panel, ferritin, vitamin D and B12

Dhruv Diagnostics, Nagpur

30+

years of diagnostics in Nagpur

2011

NABL accredited since

2

branches: Laxmi Nagar and Ramdaspeth

7

days a week, from 7 AM

Pathology, molecular diagnostics, immunology and radiology under one roof.

What the check-up covers

Heart

Treadmill stress test, resting ECG, NT-proBNP, hs-troponin

Cholesterol risk

Apo B, Lp(a), full lipid profile

Muscle and recovery

CK, CK-MB, myoglobin, LDH, liver enzymes

Hormones

Testosterone, LH, FSH, oestradiol, cortisol, IGF-1, thyroid

Long-term health

hs-CRP, HbA1c, fasting insulin, homocysteine, cystatin C

Tendon scans

Ultrasound of tendons and ligaments by an MSK radiologist

Injury scans by an MSK radiologist

Common gym injuries we scan

- Rotator cuff and biceps tendon (pressing, pull-ups)
- Tennis and golfer's elbow
- Patellar tendon (squats, jumping)
- Achilles tendon and plantar fascia (running)

Why ultrasound

- Done and reported by a radiologist trained in musculoskeletal ultrasound
- The joint is scanned while it moves; no radiation
- Compared with the healthy side, and kept as a baseline for return to training

Three plans

Base

Members starting out or under 35

- Full blood panel and ECG
- CK muscle marker
- Physician review

Partner price on request

Performance

Regular lifters, runners, members on a cut or bulk

- Everything in Base
- Apo B, Lp(a), NT-proBNP
- Hormone and full muscle panel
- One ultrasound region

Partner price on request

Elite

Competitors, bodybuilders, members over 35 starting high-intensity work

- Everything in Performance
- Treadmill stress test
- hs-troponin, IGF-1, cortisol
- Up to three ultrasound regions

Partner price on request

How a gym partnership works

What we offer

1 **Member pricing**
on all three plans for your members

2 **Check-up days at your gym**
sample collection on site, by appointment

3 **Talks by our doctors**
heart screening, supplements, doping risk

4 **A front-desk QR standee**
members book in under a minute

What your gym gets

- A medical service no other gym nearby offers
- Members over 35 screened before high-intensity classes
- Trainers who plan with real numbers: fitness in METs, recovery markers, scan results
- Injury questions answered by imaging, not guesswork

For members who feel fine

Know your baseline

Your own normal, so future changes stand out

Find silent problems early

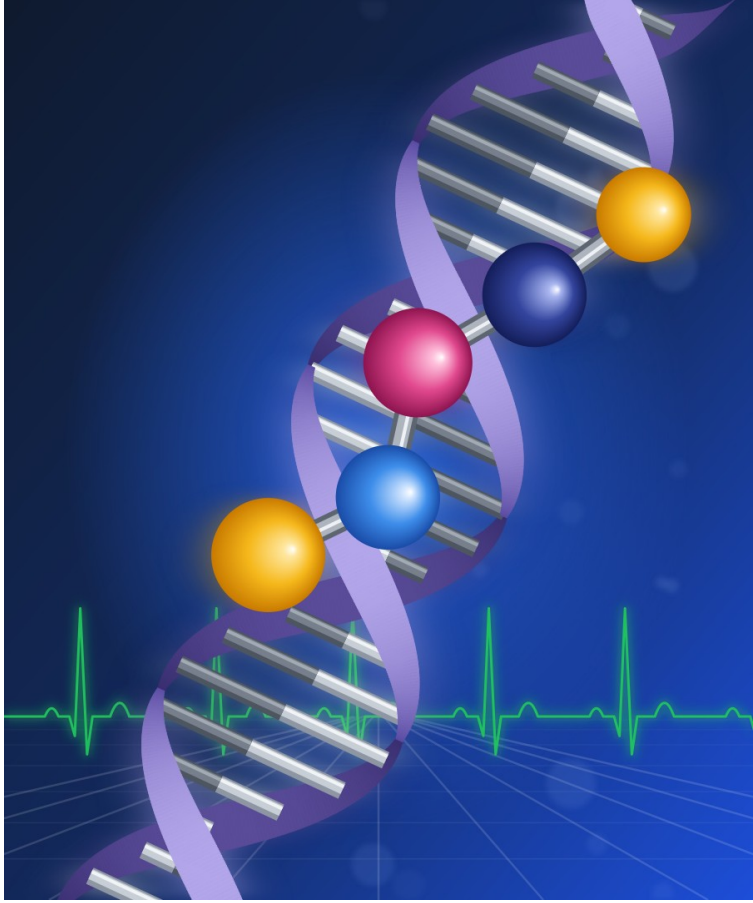

High Apo B, low iron or a heart-rhythm issue rarely causes symptoms at first

Train with numbers

Fitness in METs and recovery markers guide how hard to push

Stay safe on supplements

Liver, kidney, blood count and hormones checked in confidence

Recovery Club for women

Sauna, spa and health club, open to women members only at present.

Sauna

Dry heat after training, opened to each member after her blood pressure and heart check are reviewed.

Spa

Massage and hydrotherapy to ease soreness between sessions.

Health club

Supervised strength, conditioning and mobility work.

Men's access has not opened yet.

How booking works

1

Scan or call

Scan the QR code or call the branch nearest you

2

Confirm

We confirm the plan, the branch and your slot

3

Visit

Come fasting, between 8 and 10 am, with your supplement list

4

Review

A physician goes through the report with you

No hard training for 48 to 72 hours before the visit, so muscle and heart markers reflect you, not your last session.
