Dhruv Diagnostics, Nagpur

Athlete and Physique Health Check-Up

Heart, muscle, hormone, longevity and tendon assessment for athletes and bodybuilders, with every result read against your sport and training phase.

Heart

Treadmill stress test (Bruce protocol), resting ECG, NT-proBNP, hs-troponin

Fitness in METs, blood-pressure response, heart-rate recovery and a cardiac baseline.

Lipids and long-term health

Apo B, Lp(a), lipid profile, hs-CRP, HbA1c, fasting insulin, homocysteine, uric acid, cystatin C, urine albumin:creatinine

Apo B counts the particles that build plaque. Lp(a) is inherited and tested once.

Tendons and ligaments

Ultrasound of the shoulder, elbow, hip, knee or ankle: rotator cuff, patellar and Achilles tendons, MCL, ATFL, plantar fascia

No radiation. A baseline scan for return-to-play decisions.

Muscle and recovery

CK (CPK), CK-MB, myoglobin, LDH, AST, ALT, potassium, phosphate

Athletes' CK upper limit is about twice that of non-athletes, so we use athlete ranges.

Hormones and blood

Testosterone (total, free), LH, FSH, SHBG, oestradiol, prolactin, cortisol, IGF-1, TSH, haemogram with reticulocytes, ferritin, vitamin D, B12

Haematocrit, liver and hormone axis checks for strength athletes; RED-S markers for women.

Urine drug screen (optional)

Amphetamines, MDMA, cocaine, cannabinoids, opiates, tramadol, methadone, buprenorphine, benzodiazepines

Each result is shown with its WADA Prohibited List status. Positives need confirmatory testing.

Plan	Base	Performance	Elite
Blood panel, ECG, physician review	●	●	●
Muscle panel	CK only	●	●
Apo B, Lp(a), NT-proBNP, hormone panel		●	●
Treadmill stress test, hs-troponin, IGF-1, cortisol			●
Tendon and ligament ultrasound		1 region	Up to 3 regions

Recovery Club

Women members only at present

Sauna, spa and health club. Sauna access follows a review of blood pressure and ECG or TMT. Men's access has not opened yet.

Before you come

- Fast 10 to 12 hours; water is fine
- No hard training for 48 to 72 hours
- Blood draw between 8 and 10 am
- Stop high-dose biotin 72 hours before
- Bring your medicines and supplements list

About doping tests. Official doping control is carried out by NADA India, and at the Olympic Games by the International Testing Agency, with samples analysed only at WADA-accredited laboratories. Dhruv Diagnostics does not perform doping control and cannot certify an athlete as clean. Check every medicine against the current WADA Prohibited List.

Book at Dhruv Diagnostics, Nagpur

By appointment. Repeat every 6 to 12 months to track your own baseline.

Laboratory tests are performed in a NABL-accredited laboratory. This is a screening programme and does not replace a consultation with your own doctor.
