A reference lab for vets in Vidarbha

CBC, biochemistry, hormones and PCR for pets and livestock, from Dhruv Diagnostics, Nagpur

30+ years in Nagpur | Same analysers and quality system as our human lab

Vets in Central India send samples far away

$248M

India's veterinary diagnostics market in 2025, projected to reach $443M by 2034

IMARC, 2025

33M

livestock in Maharashtra, including 13.9M cattle and 5.6M buffalo (2019 census)

20th Livestock Census

31M

pet dogs in India at the end of 2023, and the number keeps rising

Nexdigm

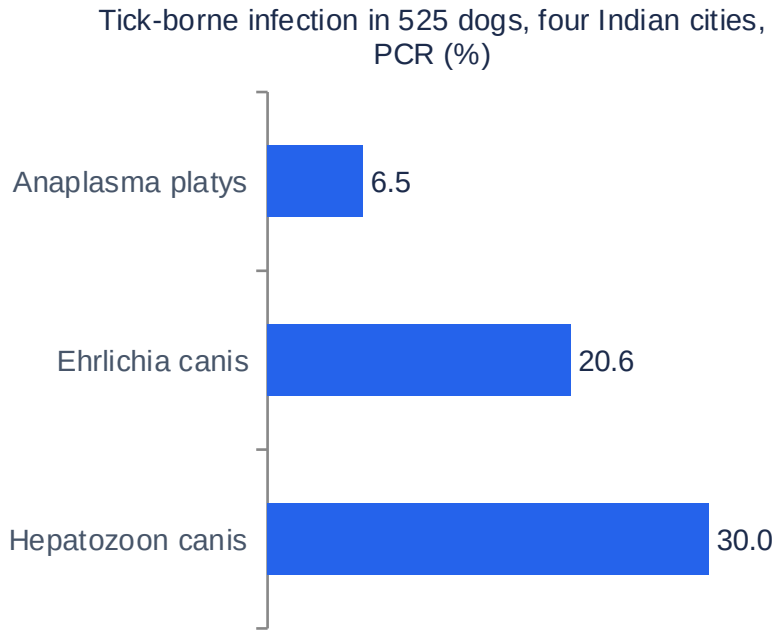

4 lakh L

of milk a day from about 35,000 Vidarbha farmers through one producer organisation

Marathvarhad MPO, 2025

Full-menu private veterinary labs (Vetic, VetLab) are based in Delhi, Gurugram and Bengaluru; IDEXX India is in Bengaluru. Nagpur has a few small pet-clinic labs.

Tick fever and parvovirus need PCR

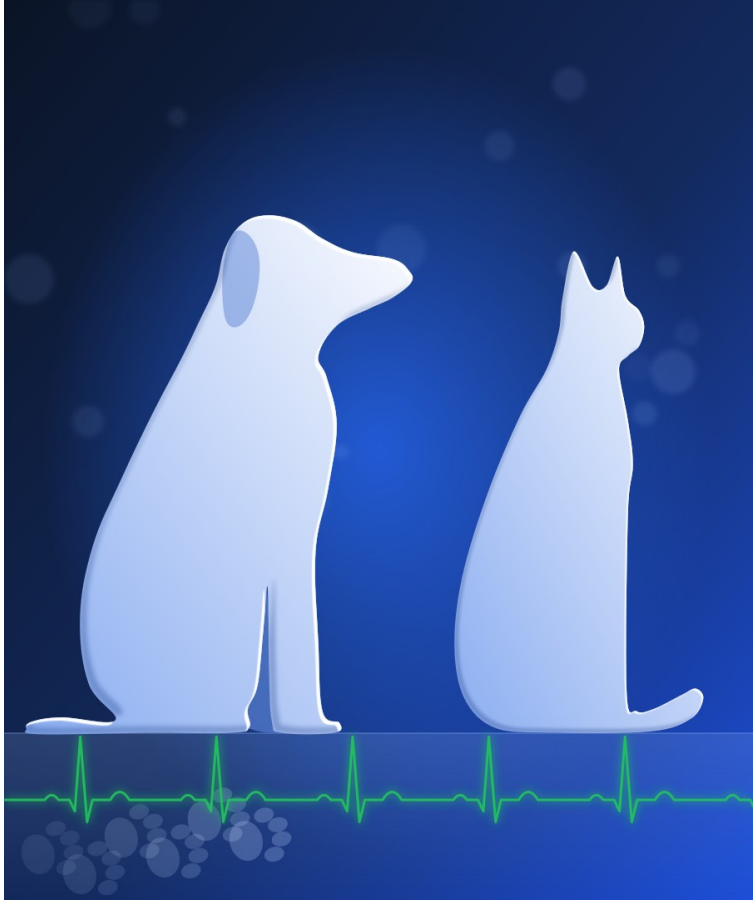

What the studies show

- In the four-city survey PCR found infection in 49.7% of dogs; blood smears found 2.3%
- In 719 Punjab dogs, PCR found more infections than blood-smear microscopy
- In Gujarat, quantitative PCR found parvovirus in 85 of 100 dogs tested
- About 30% of 578 healthy Indian cattle and buffalo carried a blood parasite on PCR

Sources: Indian multi-city survey of 525 dogs; Punjab multiplex PCR study (n=719); Veterinary World 2026 (Gujarat); Indian bovine haemoparasite PCR survey (n=578).

Tests for dogs and cats

Haematology	CBC with a blood-film review by a veterinary pathologist; blood parasites on the smear
Biochemistry	Liver, kidney, electrolytes, pancreatic (DGGR) lipase, fructosamine, bile acids, urine protein:creatinine
Hormones	Total T4, cortisol, ACTH stimulation and dexamethasone suppression, progesterone for breeding
PCR	Tick fever (Babesia, Ehrlichia, Anaplasma, Hepatozoon), parvovirus, distemper, leptospira, feline panleukopenia
Also	Urinalysis, culture and sensitivity, cytology and histopathology

Tests for dairy and livestock

Metabolic profile	Calcium, phosphorus, magnesium, glucose, beta-hydroxybutyrate, protein and liver enzymes for transition cows
Blood parasites	PCR for Theileria annulata, Anaplasma marginale, Babesia bigemina and Trypanosoma evansi
Mastitis	Milk culture and sensitivity; multiplex qPCR for mastitis pathogens
Herd screening	Haematology and chemistry for dairy cooperatives and organised farms

Scheduled diseases such as avian influenza and lumpy skin disease are referred to government laboratories.

Human-lab quality, validated for animals

Validated per species

Every test is checked in dog and cat blood before launch: precision, accuracy against a reference lab, linearity and interference, following ASVCP guidelines.

Species reference ranges

Results come with reference ranges for the species, set on our own analysers, not borrowed from human medicine.

Veterinary pathologist

A registered veterinary pathologist reviews blood films and signs every report, and takes calls from vets.

Proven systems

The same analysers, controls and quality system Dhruv has run for human patients for more than 30 years.

From your clinic to a report in hours

1

Collect

We supply EDTA and plain tubes, slides and cool boxes

2

Pick up

Daily pickup in Nagpur; chilled courier from district towns

3

Test

CBC and chemistry the same day; hormones and PCR in 24-48 hours

4

Report

Online report with species ranges and the pathologist's comments

Please send a fresh blood smear with every EDTA tube: platelet counts start to fall within 12 hours.

Launch price list

Area	Test	Price
Haematology	CBC with blood-film review	**₹450**
Biochemistry	Liver profile	**₹700**
Biochemistry	Kidney profile with electrolytes	**₹700**
Profiles	Pre-anaesthetic: CBC, liver, kidney, glucose	**₹1,499**
Profiles	Senior wellness: CBC, full chemistry, T4, urinalysis	**₹2,499**
Hormones	Total T4	**₹600**
Hormones	Cortisol (single)	**₹700**

Area	Test	Price
Hormones	ACTH stimulation (two cortisols)	**₹1,300**
Hormones	Progesterone for breeding	**₹700**
PCR	Tick-fever panel: Babesia, Ehrlichia, Anaplasma, Hepatozoon	**₹1,800**
PCR	Parvovirus and distemper	**₹1,200**
PCR	Leptospira	**₹1,200**
Livestock	Dairy metabolic profile	**₹900**
Livestock	Bovine haemoparasite PCR panel	**₹1,500**

Proposed launch prices. Clinic accounts get monthly billing; volume rates for government polyclinics and dairy cooperatives.

Ways to work with us

Pet clinics and hospitals

Clinic account, free sample kits, daily pickup, monthly billing, phone line to the pathologist

Government veterinary services

Polyclinic and district tie-ups for tests not available locally, with volume pricing

Dairy cooperatives and farms

Herd metabolic and blood-parasite screening, mastitis testing, field sample collection

Veterinary college

Validation samples, reference ranges for local breeds, CME talks and student projects

Launch plan

Weeks 0-2

Veterinary pathologist on board; reagents, controls and PCR kits ordered

Weeks 2-8

CBC and chemistry validated for dogs and cats; soft launch with partner clinics

Weeks 4-10

T4, cortisol and progesterone validated on our immunoassay analysers

Week 12

Full launch with PCR panels and the livestock menu

Early partner clinics get introductory pricing for the first three months.
